HENG MENGLY

fullstack developer

About Me

I am a motivated and detail-oriented frontend developer intern candidate with a strong interest in building reliable and scalable client-side systems. I have hands-on experience in frontend development, ux/ui design, and API integration through academic and personal projects. I am eager to learn new technologies, improve my problem-solving skills, and take responsibility for assigned tasks. My goal is to gain real-world experience and contribute to meaningful software projects while continuing to grow as a frontend developer.

EDUCATION BACKGROUND

Bachelor's Degree of Computer Science, Specialized in Software Engineering, 2024 - Present
Cambodia Academy of Digital Technology (CADT)
GPA : 3.5

WORK EXPERIENCE

Service Finder Application - Capstone Project Jan - Present
Backend Developer

- Implemented authentication using Firebase Authenticition.
- Intergrated Firestore to synchronize real-time data.
- Developed reliable backend server with Node.js and Express.
- Built end-to-end messaging using FCM.
- Designed NoSQL database collections.
- Implemented caching with reddis
- Developed middleware to validate requests and prevent unauthorized access.
- Implemented Firebase Storage for uploading and storing user profile pictures and application media files in the cloud.

Emergency Application - School Project Nov - Jan 2026
Frontend Developer

- Intergrated SQLite for date storage and querying.
- Developed user interface using Flutter.
- Designed database schema.
- Implemented favorite and history emergency features.
- Designed high-figelity wireframe using figma .

Jersey Store - School Project Aprill - July 2025
FullStack Developer

- Worked with PostgreSQL for date storage and querying.
- Developed user interface using React.js.
- Designed relational database schema.
- Implemented caching with Reddis.
- Built backend server using Node.js, Express.js.
- Developed middleware for request validation and access control.
- Stored product images using Cloudinary.

REFERENCE

Mr. Ronan Ogor
Senior Academic Expert on EdTech/ Pedagogy, CADT
Ronan.ogor@cadt.edu.kh

School Management system - School Project Jan - Feb 2025

Software Developer

- Built a desktop-based school management system using Java Swing for the graphical user interface.
- Integrated the application with MySQL using JDBC for efficient data storage and querying.
- Designed and implemented a relational database schema to manage students, staff, lecturers data.
- Applied Object-Oriented Programming (OOP) principles to ensure application, maintainable, and scalable code.
- Implemented CRUD functionalities for managing courses and tracking attendance for students, staff, lecturers.
- Implemented role-based access control to support different system users (students, staff, lecturers, administrators).

e-commerce website - School Project Jan - Feb 2025

frontend Developer

- Designed the user interface prototype using Figma.
- Developed a responsive client-side application using React.js.
- Built reusable generic components to improve code maintainability and scalability.
- Implemented React Context API to manage global state for cart and favorite items.
- Structured the UI by separating features into modular React components.
- Integrated ReactBits and AOS (Animate On Scroll) libraries to enhance UI animations and user experience.
